

JEEL BHALU

Frontend Developer | React.js | Next.js | SaaS Systems

📍 Rajkot, Gujarat, India | ✉ bhalujeel9@gmail.com | ☎ +91-90161 61086 | 🔗 LinkedIn | 🏠 GitHub

PROFESSIONAL SUMMARY

Frontend Developer with 1+ year of experience building **production-grade SaaS** and **industrial monitoring systems**. Specialized in **scalable multi-tenant architecture**, **Role-Based Access Control (RBAC)**, and **real-time dashboards** using **React.js** and **Next.js**. Strong focus on **performance optimization**, **system scalability**, and translating complex operational requirements into structured frontend solutions.

PROFESSIONAL EXPERIENCE

Frontend Developer - Wzero Infotech – Rajkot, Gujarat (2026 – Present)

IoTrope – Multi-Tenant Organization Management SaaS :

System Architecture & Access Control: Built **scalable multi-tenant architecture** with hierarchical organization structure. Designed dynamic **RBAC system**, implemented **authentication** and **protected routing**, and developed a **subscription-based feature access model**.

Real-Time Systems & Performance Optimization: Integrated **25+ REST APIs** and **WebSocket-based real-time monitoring**. Developed **live dashboards** with real-time calculations and charts. Migrated from **React.js to Next.js** and improved performance using **memoization**, **lazy loading**, and **code splitting**.

S-Square – Solar Monitoring & Control System :

Monitoring & Configuration Systems: Developed **industrial monitoring dashboard** for live **TCU/NCU tracking**. Built **API-driven configuration modules** for wind, angle, and motor parameters with **role-based access control**.

Real-Time Communication & Optimization: Integrated **MQTT-based communication** for system operations. Designed **precision numeric validation**, built **modular route-based settings**, and optimized **component rendering** through improved state management.

PROJECTS

Currency Converter (React.js)

- Built **real-time currency exchange application** using **external API integration**.
- Implemented **controlled state management** and **dynamic UI updates**.

Blog Application (React.js)

- Developed **reusable component-based blog interface** with responsive layout.
- Structured **modular content rendering architecture**.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python (OOP Fundamentals)

Frontend: React.js, Next.js, AngularJS, HTML5, CSS3

State Management: Context API, Custom Hooks

Performance: Memoization, Lazy Loading, Code Splitting, Render Optimization

Data & Communication: REST APIs, WebSockets, MQTT, Axios, Fetch API

Architecture: Multi-Tenant SaaS, RBAC, Authentication, Protected Routing

Tools: Git, GitHub, Swagger, VS Code

EDUCATION

Bachelor of Vocation (Information Technology)

RK University City Campus

CGPA: 7.82
